

Wongwit Srikaewint

Flutter Developer · Mobile App Engineer

Bangkok, Thailand | 083-418-5788 | wongwit.sr@gmail.com

SUMMARY

Flutter Developer with 3+ years building production mobile applications in the pet care and telemedicine domain. Specialized in Clean Architecture with BLoC, real-time WebRTC video consultation, and secure payment integration. Comfortable across the stack — from Figma handoff to Node.js / Next.js backend integration — and experienced owning the full release cycle on App Store and Play Store.

TECHNICAL SKILLS

Languages	Dart, JavaScript / TypeScript, SQL, HTML/CSS
Mobile	Flutter, Clean Architecture, BLoC,GetX, Platform Channels
Backend / Cloud	Node.js, Next.js, Firebase (Firestore, Auth, FCM), REST APIs
Database	PostgreSQL, MySQL, MongoDB, Firestore
Real-time / Media	WebRTC, Agora SDK, Amazon S3
Payments	Omise Payment Gateway (3DS authentication, webhooks)
Testing & Release	Unit / Widget / Integration tests, App Store & Play Store deployment
Tools	Git, GitHub, Postman, Figma, Android Studio, VS Code, Firebase Console
Practices	Agile / Scrum, Code Review, Clean Architecture

EXPERIENCE

Flutter Developer · Partnerhub Co., Ltd.

Aug 2024 – Present · Bangkok

- **Architected** a production pet-care ecosystem (consumer mobile app + admin web dashboard) using Flutter and BLoC with feature-based Clean Architecture for long-term maintainability.
- **Engineered real-time video consultation** using flutter_webrtc with custom signaling, including reconnection handling for unstable network conditions.
- **Owned end-to-end payment integration** with Omise Gateway — implemented 3DS authentication and webhook handling for transaction status updates.
- **Built booking & pet identity system** inside the AnyVet app — appointment scheduling with conflict detection, digital pet ID with QR linkage, and microchip number registration.
- Collaborated with veterinarians and product team to translate complex domain workflows into intuitive mobile UX.
- Delivered cross-platform releases to **App Store and Play Store**, owning TestFlight beta, store listing, and post-launch monitoring.

Flutter Developer (Freelance) · Self-Employed

Jan 2023 – Jul 2024 · Remote

- Delivered a production pet-care application for an independent clinic, owning the full lifecycle from requirements gathering through App Store / Play Store release.
- Integrated **Agora SDK and Amazon S3** for HD video consultation with cloud recording, automatic upload, and signed-URL playback.
- Migrated complex screens from setState to **GetX reactive controllers**, centralizing state and lifecycle management to reduce unnecessary widget rebuilds.
- Built dynamic CMS with embedded HTML editor, enabling clinic staff to publish articles and Q&A content without developer involvement.

Mobile Developer Intern · Smart University Cooperation Center (RMUTI)

May 2021 – Jun 2021

- Contributed to the "Yamo Application" (React Native), implementing UI screens from Figma designs into functional cross-platform code.

EDUCATION

B.Sc. Computer Science · Khon Kaen University

2018 – 2022
